

archetype

salamanderdesigns.com

Every Archetype System employs threaded, solid-steel support posts and matching fasteners to hold shelves securely while providing infinite vertical adjustability. The 3/4-inch shelves are rigid and are strong enough to support 150 pounds each. Metal and neoprene spacers sandwich shelf corners, further isolating contents from vibration.

AN ARCHETYPE SHELVING SYSTEM FOR NOW AND

Lifetime Quality

Everyone claims quality. You deserve proof. Ours is in the details: The grain of our solid-hardwood shelves and the black-oxide, gunbarrel finish on our solid-steel support posts (it's applied by craftsmen used by Colt's and other major firearms makers). Ball-bearing glides, which permit our 100-pound- capacity drawer to slide smoothly and precisely. Vibration-eliminating mounting spikes that weigh in at nearly half a pound each. We could go on and on. Because we really do build shelving for a lifetime.

The dictionary defines Archetype as a model.

Salamander Designs shelving fits that description. We've created a system of elegant and highly-functional modular elements that combine in a variety of ways. The system is interactive and allows you to configure shelf units that precisely suit your current requirements. Should your needs change, you can reconfigure them. As often as you wish.

SUBSTANCE

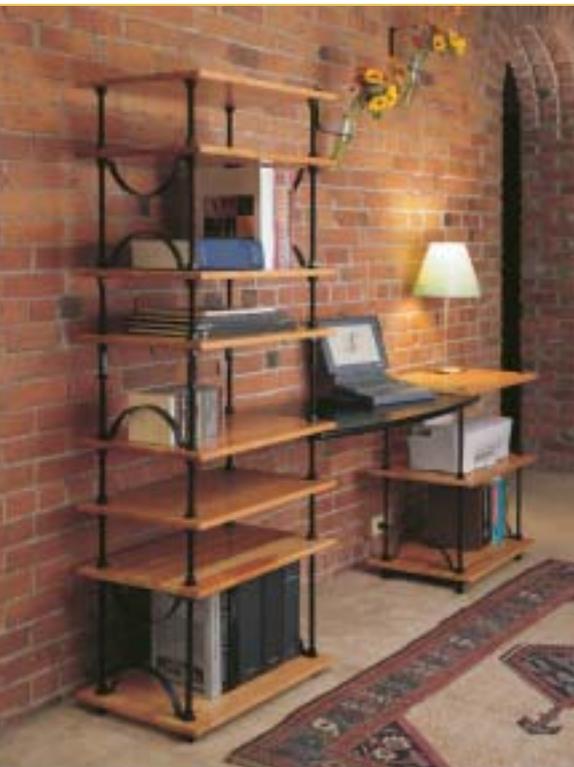

Whatever your room decor, our finishes will complement it beautifully. Hardwoods include rich Solid Cherry, Solid Maple and Solid Walnut. Medium-density fiberboard (MDF) is available in a striking soft-gloss Black while a fifth option combines Black MDF surfaces with front shelf-edges crafted of Solid Natural Cherry.

Archetype 5.0 Our most popular unit, the 5.0 is often used as the foundation for an expanded Archetype system. It provides five shelves along with the flexibility of infinite vertical adjustment. It's 36 inches tall by 23 inches wide by 16 inches deep.

Archetype 3.0 This three-shelf model stands gracefully on its own and is easily placed beside or atop another Archetype unit. The 3.0 is 28 inches high.

Archetype 2.0 A compact two-shelf unit that can stand alone or serve as a vertical or horizontal extension, Archetype 2.0 is 20 inches tall.

Archetype TV40 and TV35 Video Platform Stands, expressly designed to hold today's larger screen televisions, feature one-inch-thick shelves for superior strength. The TV40 measures a full 42 inches end-to-end and can accommodate four components along with a TV. The TV35 is 36 inches wide. Both Video Platform Stands are 20 inches high and come equipped with three shelves. Veneer finishes include Black as well as Cherry, Maple and Walnut.

"The system's real beauty lies in it's flexibility. The shelf units can be configured in any number of ways to create attractive furniture solutions ."

VERSATILITY

Twin Platform You can virtually double the width of any Archetype unit with our Twin Platform, which is supplied with two threaded-steel posts for center supports. The 43 1/4-inch Twin Platform integrates perfectly with the Archetype 5.0, 3.0 or 2.0. Simply specify shelf finish and post height.

No one can top our **Monitor Platform** when it comes to supporting a TV or computer. It's 20 inches deep by 30 inches wide by a sturdy 3/4-inch and is available in all five of our finishes.

A **Peninsula** will extend the top of an Archetype 3.0 to one side to create a convenient desktop. Each Peninsula comes with a black aluminum leg. Legs are handsomely fluted and are designed to conceal wiring. Peninsulas are a full inch thick for the strength you need and are finished in black.

"The possibilities are staggering, they really are. This whole convenience idea isn't limited to hi-fi. I've got Salamander racks masquerading as real furniture....So if you drop in on me, don't be surprised to find I've furnished my house entirely with the stuff."

-Stereophile, Editor Wes Philips

As well as neatly linking Archetype shelf units, a Bridge provides a convenient surface for a television, speaker or computer work station. Bridge One is 18 1/2 inches deep and measures 32 inches from end to end while Bridge Two is 24 by 42 inches. All bridges feature one gracefully curved edge and a flat edge that echoes the shape of a flat-screen TV; you choose which faces outward. For exceptional strength, bridges are an inch thick. They're finished in black.

(2) ARCHETYPE 5.0 + (2) ARCHETYPE 2.0 + TV35 IN MAPLE + (2) BRIDGES AND ACCESSORIES

FLEXIBILITY

All you need to mount Archetype units on top of one another is our **Stacking Kit**, which contains hardware that connects support posts while maintaining rigidity.

For additional design flexibility, we make **Single Shelves** available in all five of our finishes.

We offer two convenient **Cable Management** solutions for Archetype units. Opt for a **Rear Panel**, and simply pass wire through any of the circular openings that run along its centerline. Or choose our **Cable Manager**, a channel that's easily mounted behind a rear support post, and tuck your wires into it.

Rubber feet are standard Archetype equipment. You also have three alternate footing options, including precision-machined **Megaspikes** for the highest degree of protection against vibration. **Dual-Wheel Casters**, make it easy to move without sacrificing strength. For extra-heavy loads and added elegance, choose our silver-toned **Saturn Wheels**. They're globe-shaped, and they employ rubber rings to damp resonance while enhancing mobility.

An accessory **Drawer** will keep discs and tapes or other necessities hidden yet at hand. Precision ball-bearing glides assure smooth operation, and installation is quick and easy with our unique overhead-mounting system.

Arch Bookends Elegantly-curved and very practical, these side supports affix quickly to the top or bottom of any Archetype shelf with just a few turns of the wrist. Assembled units need not be taken apart.

MEDIA STORAGE

Salamander Designs Introduces Solutions for Media Storage

The Fusion collection boast sculptural side panels and strong aluminum shelves that may be adjusted for optimum height and viewing angle. Available in three different sizes in American Cherry, Natural Maple, Dark Walnut and Satin Black.

Fusion™
MEDIA STORAGE

Collaborate With The Configurator

Our web site includes a particularly useful tool called the Custom Configurator, which allows you to drag scale drawings of Synergy components onto a grid representing a wall of your home. Use the Custom Configurator to create the furniture system that suits you best — and to get a complete list of the elements you'll need for it.
